## MAGIC 5025 / 7025

### THE HIGH-END FLASHCURE TECHNOLOGY

HIGHEST EFFICIENCY = FASTEST DRYING

HARMLESS TO THE TEXTILE - LESS ENERGY-CONSUMPTION

It ensures easy use, low consumption and high performance. An IR optics pyrometer instantly detects the ink temperature and stops the heating when the required temperature is reached, thus preventing the fabric from burning no more overheated pallets.

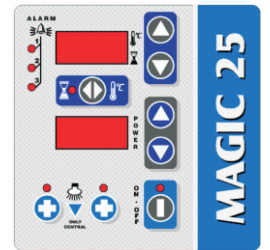

precisely and reproducibly results  
the 9 lamps contained in Magic 7025 are made of tungsten in vacuum, a special feature which increases the life and switching on speed.

It is possible to work with 3, 6, or 9 lamps,  
Stand-by automatic 20 - 50%

air circulation for cooling the controller and to support the drying-process of waterbased inks.

Diagnostic-programm

quick-change of the lamps

Technical data:	MAGIC 5025	MAGIC 7025
Strahlerfläche:	500 x 500 mm	500 x 700 mm
electr. connection:	9 KW - 14 A 3x400 V + N + PE	13 KW - 19 A
measurements:		
length:	1.080 mm	1.280 mm
width:	585 mm	585 mm
working height:	850 - 1.050 mm
