

MAGIC-FLASH

MAGIC 5025/7025

The high-end flashcure technology

Medium-wave IR-radiators

Radiation surface: 500 x 500 mm 20" x 20" / 500 x 700 mm 20" x 28"

With IR-Pyrometer which measure permanently automatically the setted Radiation-temperature on the textile and/or the ink.

Thus a constant temperature is guaranteed during the entire duration of printing.

Harmless to the textile, no more overheated textiles and pallets

Stand-by automatic 20 - 50% - Power automatic 20 - 100%

Electrical power supply 9 kW 14 A 3x400V/ 13 kW 20 A 3x400V

incl. Trolley with wheels

For all kind of inks, with air-circulating for waterbased inks.

The 9 lamps are made of tungsten in vacuum,

a special feature which increases the life and switching on speed.

ALPHA-LINE with MAGIC FLASH 7025 - image area 20" x 28" - 500 x 700 mm
